6 - What skills or knowledge did you learn or improve?

Response Rate	12/54 (22.22%)

- What it takes to build a business
- I feel that this gave me a great understanding of entrepreneurship from a social lense, whereas before this course I had only really looked at entrepreneurship from a broader lense/scope.
- lots about social entrepreneurship
- My understanding on social entrepreneurship.
- What it means to be a social entrepreneur, and what the things are that we need to take into account before starting a social impact venture.
- I learned in about as much detail as one can without actually starting a venture how to properly start a venture (emphasis on the "properly"). The good practices learned in this course were what gave it, in my opinion, its highest value. The public speaking class day, even though it was only one day, was also very important and useful.
- Basics of social entrepreneurship and how to approach these issues
- How to evaluate a social venture and social issues
- How to construct a pitch
- I learned how to build a social venture and understand the different financing tradeoffs
- I think my venture. creation process because more fruitful, as I can think of ventures more quickly (alongside their funding models). I also think I learned a lot about how to think through problems.
- Just my knowledge of entrepreneurship

9 - What would you like to say about this course to a student who is considering taking it in the future?All comments are subject to Stanford's Terms of Use for Sites. Answers to this question will be viewable by other students, as well as instructors.

Response Rate	15/54 (27.78%)

- Fun class where you really dive into one big group project and build a social enterprise from the ground up.
- Dr. Burrage made this an interesting and enjoyable class. Plenty of interesting guest speakers as well.
- I definitely recommend taking this course! It is super interactive, a lot of quality content and learning, and the guest speakers were also amazing to hear from!
- This class was quite organized, especially on canvas and the teaching team is super kind. My biggest issue with this class is how rapidly and suddenly It picks up. We spent the first 4-5 weeks in class doing worksheets that often didn't take very long, yet all of a sudden by the middle of the quarter, had a huge deliverable due at the start of every class. This was extremely frustrating and difficult to manage and also made it difficult to understand how to improve as feedback for the previous assignment often came pass the due date of the next assignment. In class speakers were AMAZING though and I loved that.
- Pretty chill class and interesting. Very group dependent.
- The Teacher and TA are great. They are super accommodating and will make time to meet with you and help you outside of class hours as well.
- One usually doesn't "learn" how to do a startup without actually doing it, but if that's what you're looking for, this is the course to take. Prof. Burrage is poised, intelligent, and uses her connections to bring in domain specific experts.
- Great class
- Phenomenal course. Really good professor. super organized, not too much work. Very manageable and you learn a great deal. Highly recommend to anyone who is looking for MS&E electives.
- Make sure to pick a good group for the project. I appreciated the guest lectures and the case studies. The pace picks up with group project deliverables towards the end, so make sure to stay on top of your deadlines.
- I really enjoyed this course and the content and assignments were fair and it wasn't too much work. Definitely recommend taking it
- This is honestly one of my favorite courses I have taken. Make sure you have a good group.
- This course is just a lot for 3 units. The capstone group pitch and the scaffolding assignments leading up to it are alone a lot. Then, you have a case study, multiple reflections after classes and 2 large ones at the end, and make a video. This class is interesting but there was way too much packed in to fully enjoy the course. Feedback was often slow and unclear. A lot of the final assignments had conflicting assignment guidelines which made things difficult.
- Take it!
- Very organized and well taught. Professor Burrage is an excellent instructor that cares a lot about social entrepreneurship and each of her students. Highly recommend taking this course as it gets you to think differently about social problems and how to solve them. Not too much work if you have a good group for the project.

10 - Would you like to provide any other comments about this course?	
Response Rate	2/54 (3.7%)

• spread out the workload more evenly throughout the quarter. consider shorting class time or having more class speakers

• I would like to especially highlight Prof. Burrage. As I said in the student feedback section, Prof. Burrage brought professionalism and poise, and I though that meaningfully improved the class beyond the raw material.
